

Vote Liquid Europe!

With liquid.eu - the European fork of liquid.us

⇒ Conquer legislative assemblies with liquid candidates, one drop at a time.

Liquid democracy engagement platform built for the European and National legislative process

This project aims to replace *political parties' loyal representatives* with *direct democracy + personal proxies you trust*

Liquid.eu - the European fork of liquid.us

Political engagement platform built for the legislative process at every level:
European, National & Local legislation

Engage your proxies with their email or twitter... *and change them whenever you like*

This project aims to replace *political parties' loyal representatives*
with *direct democracy + personal proxies you trust*

Liquid Future Philosophy

Videos and podcasts: <http://liquidfuture.org>

Hello Democracy!

First we discovered paper, then printing, then computers. And since then democracy is rising.

1. Better Citizen Communication with the Internet
2. Better Citizen Information with the World Wide Web
3. Better Citizen Collaboration with the Commons (free software, wiki, open-source/data/science/knowledge/collectives...)
4. Better Citizen Cooperation with the P2P blockchain
5. Better Citizen Discussion with the Web annotation (hypothes.is, chime.in, dissenter...)
6. Better Citizen Consultation with civic technology (open government, DemocracyOS, LiquidFeedback, Decidim, Consul...)
7. **Better Citizen Legislation with Vote Liquid** engagement platforms for legislative process: first [Liquid.US](https://liquid.us) & then *Liquid Europe*
8. Better Citizen Sovereignty with the <https://Democracy.Earth> Foundation
9. Better Citizen Privacy with anonymity networks (first Tor then Substratum? Solid? Shift? Particl?)
